Abstract (en)

[origin: EP0773320A1] The security paper material (1), produced by a papermaking process, has a strip (4) within the paper sheet together with a filigree in a hollow or relief structure. It acts with the strip to give the sheet a constant thickness. Also claimed are (i) bank currency notes containing security paper material support as above; and (ii) stacking of security papers or bank currency notes of homogeneous thickness in the same way as given above.
