Abstract (en)

[origin: EP0773568A2] The electrical switch 1 is of a type operated by a rocker 3 that locates on a central pin that locates in a bearing element 35 that moves around a pivot point 34. The lower end of the bearing element has a pin 31 that displaces a movable contact carrier 2 relative to fixed contacts on a circuit plate 4. The plate is engaged by connection pins 10 in a plug 5 and this has a latching element 8. Pin extensions 11 project in a socket section for external connection.
