Abstract (en)

[origin: JPH09320673A] PROBLEM TO BE SOLVED: To lessen the manufacturing and/or storing cost of plug apparatuses by opening single casings of single plugs in end faces in the insertion sides and surrounding the other sides with housings having through holes to insert contact pins into in one end walls. SOLUTION: A single casing 2 having larger side faces 3 and smaller side faces and a single plug 1 having a contact pin 5 are connected. The single casing 2 is surrounded with a casing 8 having an outline with a rectangular transverse cross-section, the casing 8 is opened in one end face 9, a through hole 12 into which at least one contact pin 5 is inserted is formed in the casing 8 in other end wall 10 on the opposite to the face 9, and at the same time a through hole 14 with a size fitted with a projected part 7 for snap-fitting of the single plug 1 in the larger side face 3 is also formed.
