Abstract (en)

[origin: EP0773610A1] The process uses an automated machine system which is free- standing and is constructed with a modular form, The machine has a number of feed channels Å6Ü in parallel that serve as a magazine for the contact components that are to be fitted to the cables. An assembly station Å2Ü is supplied by a buffer storage section Å11Ü and positioned behind this is a contact and testing station Å12,13Ü. The system has a control unit Å3Ü a text display Å15Ü.
