Abstract (en)

[origin: EP0773612A1] The machine provides a facility for fitting contact elements onto various lengths of cable that make up a wiring loom. The system has a block magazine Ä1Ü, an article feed stage Ä2Ü, a contact station Ä3Ü and a test station Ä4Ü. The semi automatic machine has an operator for initiating specific functions. A feed unit is incorporated within the block magazine that displaces components . This has a slide element displaced by a roller drive. A proximity sensor indicates extraction of components
