Abstract (en)
[origin: GB2291780A] A safety collar 10 has two air bags 13 and 15 for fitting at the sides of the neck to prevent over-tilting of the head. The bags are somewhat separated from an upright neck and are arranged to rest on the shoulders of the wearer. In use, the safety collar prevents nerve root damage in the cervical region which can occur in accidents due to excessive sideways tilting of the head. The collar may be incorporated in a safety helmet 17 and include a third bag 14 at the back. <IMAGE>
