Abstract (en)
[origin: EP0775630A1] An electric outboard drive system for a watercraft (1) has a support casing fastenable on a hull (2). Further, an electric drive unit (6) is disposed at the lower part of the support casing and a control unit (7) is disposed at the upper part of the support casing for controlling the electric motor drive unit. In this system, electric components generating a large amount of heat during operation are disposed within the electric drive unit (6) and electric components generating a comparable smaller amount of heat during operation are disposed in the control unit (7). <IMAGE>
