Abstract (en)  
[origin: EP0775636A1] A first folded unit (14) has a larger cuboid shape than the product (12) and has a first cavity (18) on one end side for inserting the product through into the first folded unit. A second folded unit (16) larger than the first folded unit has a second cavity (20) at one end side for sliding the first folded unit with the product into the second folded unit. The second folded unit, on the end facing the second cavity has a foldable flap (22) containing the product when inserted. The first folded unit is withdrawn from the second folded unit as far as a stop piece formed by a folded strip (24,26) on the first and second folded unit.
