Abstract (en)
[origin: EP0775870A1] The arrangement for the combustion chamber (1) of a gas turbine has a pressure sensor (6) and a controller (10). This is connected to the unit controlling the flame electrically, the latter being a voltage source (11) and an electrode (14). The electrode has a heat-protection shield (12) surrounding the downstream side of the chamber in a ring.
