Abstract (en)

[origin: EP0775874A1] The device(10) preferably has a fastening unit which is nearest to the building, and which is roughly in the form of a screw (12) for a plug. The device has a fastening unit which is nearest to the object, and which is roughly in the form of a bolt (14) which is fixed to the latter. This unit is held by retainer(16), which has an eccentric opening (18), which is associated with the side which is nearest to the building.
