Abstract (en)

[origin: WO9639182A1] A dual carrier immunogenic construct comprised of at least one primary carrier comprising large molecular weight molecule of greater than a 70 kDa molecular weight and at least one secondary carrier comprising a T-dependent antigen conjugated to a primary carrier. The dual carrier immunogenic construct may further comprise moieties such as haptens and antigens. Such immunogenic constructs are suitable for use in the diagnosis, treatment, and prevention of diseases.
