Abstract (en)
[origin: EP0776615A2] Cycling trousers for men and women feature an insert made of natural or synthetic leather and located in the body area resting on the bicycle saddle. It is made of a single, flat piece and is symmetrical in relation to the plane of symmetry (I) of the bicycle. Both the wider rear section (12') and the narrower front section (12'') of the insert feature a narrow notch (13), which is located on the plane of symmetry (1), and has the shape of a slightly open V. The notches (13) extend over an initial section of the corresponding zone and do not reach across the middle of the zone (12', 12'').
