Abstract (en)

[origin: EP0776623A1] The fixture has a one-piece elongated plastic profile strip with a fixture part (7) extending over its length. The fixture part is for the introduction of clamps (15) in the frame (2) of the furniture. An accommodation part, facing the inner edge of the frame is provided for the corrugated springs (3) with spaced suspension loops (4) in the strip longitudinal direction, for the spring ends (5). The suspension loops are formed by a short casing extending from the fixture part of the plastic profile strip (6) to the frame interior, the inner wall of which has a rounded area for pivotable support of the spring end. The casing has a hollow profile which is closed on the peripheral side and open at its two face ends.
