Abstract (en)

[origin: EP0776742A1] The pressure bearing component (7) has several pressing-on rollers (8) with a controlled pressure progression and which are spaced apart and located along the pressure bearing section. Several cylindrical bodies in the form of drums or rollers are spaced apart on a straight line to support the metal band. A second metal band (2) is guided over rollers and runs parallel to the first, and is in contact with the pressing-on rollers.
