Abstract (en)

[origin: EP0777248A2] The relay has an armature (5) connected to a flat spring (6), which forms a switch contact spring and a restoring spring in one piece, and is mechanically and electrically connected to a load current connector (11) with a spring fixing region (11a) and a connection region (11b). The spring fixing region and the connecting region are flexible wrt. each other. The connecting region forms a flat plug part. The spring fixing region has a stamped section (19). The load current connector has a slot-shaped aperture (18) between the spring fixing and connecting regions.
