Abstract (en)  
[origin: WO9606784A1] A package (1) for pourable goods has a container (2) with a closable pouring opening (10) and a closable refilling opening (32). In order to obtain a package that allows even small amounts of product to be poured or dosed in a perfect manner, that may be optimally refilled and is easy to handle, the refilling opening (3) can be tightly closed by a swivelling lid (7) hinged to the container (2) and the closable pouring opening (10) is integrated into the lid (7) of the container (2).
