Abstract (en)  
[origin: EP0777985A1] Foldable screen, comprising a cloth and a frame, which frame comprises a stem and ribs, and the cloth being releasably connected to the frame by fastening means, in which the fastening means with which the cloth is connected along the ribs each comprise an element (1) with a cylindrically shaped wall with a groove (2) through the wall, parallel to the axis of the element, the width of the groove being smaller than the diameter of a rib, the cylindrically shaped wall enclosing a rib and the fastening means being unreleasably connected to the cloth on the side of the cloth on which the ribs are situated. <IMAGE>
