Abstract (en)
The tube closure for a plastics tube has a cap (6) connected by a hinge (9) to a fixing part (1) with two borings (13) in it by which it is fitted on two pins (4) on the tube shoulder (2). The fixing part may be crescent-shaped, with its outer outline corresponding with that (11) of the shoulder, and with its inner outline fitting against the tube neck. The pins may have edgings on them. The hinge may consist of a middle part and two side parts made in an arc shape. The fixing part may have two intended break points connecting it to a security ring along the outer outline of the shoulder.

Abstract (de)
Ein Tubenverschluß (5) für eine Tube (1) weist einen topfförmigen Deckel (6) und ein über ein Filmscharnier (9) verbundenes Befestigungsteil (10) auf, das zwei Bohrungen (13) besitzt, mit dem es auf zwei Zapfen (4) an der Tubenschulter (2) aufgesteckt ist. Hierdurch werden doppelwandige Strukturen am Deckel (6) vermieden. <IMAGE>
