Abstract (en)
Detergent dispensing system comprising a container (1) filled with detergent and having a funnel shaped bottom (13) with substantially central pooring opening, the cross sectional dimension of which is substantially smaller than the cross sectional dimension of the container at a distance from the funnel shaped bottom. The bottom (13) is preferably collapsible. The bottom is preferably of foil like material. The bottom is preferably part of a bag type element, at least partly surrounded by a shell (2) of rigid shape.
