Abstract (en)

[origin: EP0778549A2] The automobile has a key used for locking and unlocking the vehicle and allowing the engine to be started, with diagnostic data stored onboard the vehicle transmitted to a remote read-out device only when the key is inserted in the latter and the correct vehicle identification is read from the key. The transmitted data can be displayed on a display screen upon reception by the read-out device for verification of correct transmission.
