Abstract (en)  
[origin: WO9606834A1] There are provided silicone containing imidazoline compositions represented by formula (I) wherein: R is an aliphatic radical containing from 4 to 40 carbon atoms; R1 and R2, which may be the same or different is selected from hydrogen and lower alkyl; R3 is an organosilicone chain represented by formula (II) wherein: R5 may be R6, -R4- and mixtures thereof, wherein R4 is alkylene, branched alkylene and alkylene with heteroatoms, with the proviso that at least one of R5 is a -R4- group. R6 can be selected from alkyl, aryl and olefin; R7 and R8, which can be the same or different, are selected from alkyl, aryl, capped or uncapped polyoxyalkylene, alkaryl, aralkylene and alkenyl; a can be an integer of 0 to 50,000; b can be an integer of 0 to 5,000; c can be an integer of 0 to 100.
