Abstract (en)

The invention relates to a wrapped bundle (20) comprising one or more rows of plastic containers (1) and an outer wrapping layer (16), the or each row comprising a container at each end of the row, each of the end containers comprising a handle (10), the handle being asymmetrically located on the container to provide a first side of each container which contains the handle, and a second, opposing, side of each container which does not contain the handle, and wherein the first side is more rigid than the second side, whereby the first side of the end containers is directed towards the outside of the wrapped bundle (20), and the second side of the end containers is directed towards the middle of the row; or the handles (10) of adjacent containers (1) are directed towards opposite sides of the wrapped bundle (25). <IMAGE> <IMAGE>
