Abstract (en)

The opener has a rectangular block shape formed from plastics, and is the size of a match box. A cylindrical tool (13) with a inner four-sided formation (14) is firmly, pivotably or exchangeably fixed to one of its smaller sides. The rectangular body (10) constituting the opener has a mouth opening (11) in which is fitted a blade (12) of a customary capsule lifter. It is possible to fix the cylindrical part pivotably on the rectangular body, so that it can be pivoted in a position altered through 90 degrees , even when the inner four-sided formation is not inserted. It is also possible for the cylindrical steel part to be fixed exchangeably and not pivotably to the rectangular body.

Abstract (de)

Flaschenöffnerwerkzeug für den Haushalt, das allgemein die Form eines Quaders hat und aus Kunststoff gebildet ist, vorzugsweise in der Größe von etwa einer Streichholzschachtel. Im Bereich einer der kleinen Begrenzungen ist ein im wesentlichen zylinderförmiges Werkzeug (13) mit Innenvierkant (14) fest, schwenkbar oder auswechselbar befestigt. <IMAGE>
