Abstract (en)

A device for treating environmental air, such as an air conditioner of split type, comprising an evaporating unit (1) and a condensing unit (2) separated from each other but connected together by a flexible connection (15), the evaporating unit (1) being positioned within the room to be air conditioned and the condensing unit (2) being positioned external thereto, said device comprising an evaporator (21), a compressor (12) and a condenser bank (5). The compressor is positioned within the condensing unit, this latter and the evaporating unit being separable and being positioned on rotating members enabling them to be moved along a support surface. <IMAGE>
