Abstract (en)

[origin: EP0779678A1] The intermediate screw/electrical cable block has a rear insertable foot section (38) which mates with screw (14) on a screw bar connector (10). The screws clamp the intermediate block in position. The rear of the cable block has holes (22) outputting at an oblique angle upwards, and having screws (33) which clamp the electrical cable (13) in position, thus making electrical contact between the electrical cable and bar.
