Abstract (en)
[origin: WO9607955A1] Imaging apparatus incorporating a substantially rectangular organic photoreceptor sheet having a backing layer, a conductive layer and a photoconductive layer, wherein along one edge of the sheet there is an exposed conductive area, a drum having a longitudinal cavity formed therein and including a slot formed between the cavity and the cylindrical surface of the drum into which the one edge of the photoreceptor sheet is inserted and a rotatable element within the cavity which, in a locking position, presses the sheet against a wall of the cavity, fixedly and removably holding the photoreceptor sheet in place.
