Abstract (en)
A method of filling a bag (1) of the type having a mouth end and a foot end is provided. The foot end is shaped to provide a substantially stable base (5) to allow the bag (1) to stand on a surface and has recloseable elements (8) adjacent the mouth to allow the bag to be opened and reclosed. The method comprises the steps of providing a string of bags (1) interconnected by elongated support members (3) adjacent said mouth or interconnected by the recloseable elements (8), opening the mouth of the bag (1), filling the bag (1), closing the bag (1), closing the recloseable elements (8), and separating the bags (1) into individual closed bags. <IMAGE>
