Abstract (en)

[origin: EP0780319A1] There is provided a paperboard retaining device for a plurality of articles arranged in rows, each article tapering inwardly towards its heel. The device comprises a top panel (14), oppositely disposed side panels (20, 21) hingedly connected to the top panel (14) and base panel means (29,30) hingedly connected to the side panels (20,21). The base panel means have a pair of spaced, upstanding keel panels (33) for disposition in the space between the articles of a pair of adjacent rows and at least one spacer tab (35) for keeping the pair of keel panels (33) spaced apart. <IMAGE>
