Abstract (en)  
Between two adjoining surface components (7) are intermediate spaces. A heat insulation component (18) covers an intermediate space both in a crossways direction (6) and in a longitudinal direction. The heat insulation component is arranged on the weather side (21). The holding profiles (3) support on the edges of the surface components (7) outer sealing strips (14). Between two adjacent outer sealing strips and the holding profile a weather-side part of intermediate space is fully filled out by the heat insulation component. The heat insulation component locates firmly on the outer sealing strips and partly overlaps the edges of the surface components.

Abstract (de)  
Fassadenprofilkonstruktion mit raumseitigen Tragpfosten (2), mit wetterseitigen Halteprofilen (3), mit zwischen den Trag- (2) und Halteprofilen (3) fixierten Flächenelementen (7) und mit jeweils zwischen zwei benachbarten Flächenelementen (7) gebildeten Zwischenräumen, wobei den jeweiligen Zwischenraum sowohl in Querrichtung (6) als auch in Längsrichtung ein Wärmedämmelement (18) abdeckt. <IMAGE>
