Abstract (en)

[origin: EP0890887A1] A covering member (4), a solar battery (3) and a hand-operating mechanism-containing movement (2) are housed inside a case (1) which has a front side opening (1a), a glass (5) which is provided in the front side opening (1a), in the order of these constituents from the face side of the case (1). The solar battery (3) is disposed opposite to the glass (5) at a light receiving surface thereof which is covered with the covering member (4). The covering member (4) also serves as a dial, and light reflection layers (11) improve the light transmittance to the receiving surface of the solar battery (3). <IMAGE>
