Abstract (en)  
[origin: DE4432662A1] The invention concerns a self-propelled harvester (1), in particular for harvesting green fodder, with a cutter (2) to cut the plants, a processing device (4) to process the plants, a compression device (7) to compress the plants into a mat and a delivery device (8.1) to lay the mat of plants on the field. The harvester is characterized, amongst other things, in that a device (5.3, 7.1) designed to assist the flow of cut plants through the harvester is located in front of a plant-conveying or processing device.
