Abstract (en)

[origin: DE19526335C1] The invention concerns a folding box for packaging objects, said box having a cuboid body (10). Disposed in the body (10) is an insert (30, 30a) for holding the objects and a compartment (45) for an accompanying leaflet. According to the invention, the integral blank (46, 46a) of the folding box is designed such that the folding box can be produced in only a few folding steps. This object is achieved by the special arrangement of the insert (30, 30a) on a longitudinal bonding strip (15, 15a).
