Abstract (en)

The present invention relates to apparatus for coating the interior of a pipe (1). The apparatus includes a rotating member (10) which may be moved along the inside of the pipe (1) and means (12) for directing a stream of a liquid resin coating onto the rotating member (10) so that the liquid resin is thrown from the periphery of the rotating member (10) under the action of centrifugal force onto the walls of the pipe (1). The liquid then cures, coating and sealing the interior of the pipe. <IMAGE>
