Abstract (en)

An electrical connector has a base (1) with a row of conductor openings (5) through the base (1) and a slotted plug socket (8) in one base side parallel to the row. A plug (15) has conductive surfaces and is insertable into the socket (8) to wedge conductors against the conductive surfaces. Conductor grooves (10,12) are provided in the slot at positions matching the conductive surfaces. <IMAGE>
