Abstract (en)

[origin: EP0782352A2] A method and system for determining the location of a subscriber of a two-way paging service includes a telephone network with a switched network and a paging service operatively connected thereto. The paging service includes a paging receiver for receiving a location parameter from a two-way pager of a subscriber of a paging network. The switched network includes a unit for generating a location message to a caller when the caller queries the network for the subscriber location. <IMAGE>
