Abstract (en)

[origin: WO9703906A1] In order to find the opening position of printed sheets (4) fed one behind the other to the sewing device (15) of a thread sewing machine (1), the sheets being astride on a transfer device (8), said sheets are taken past a monitoring device which uses the printed images to check the sheets, on at least one of the sides forming the inner fold edge of a printed sheet (4).
