Abstract (en)
[origin: DE4433245A1] The present invention concerns novel fullerene derivatives of the formula (I) in which the symbols and indices mean: F - a fullerene radical of the formula C_{20+2m}, where m = 2 to 100; R<1> - an aryl radical which may be substituted by 1 to 5 substituents; R<2> - a XOIX radical in which X = H, OH, Cl, Br, OR, NH₂, NHR or NRR'; and n - a natural number from 1 to 10+m, with m = 2 to 100; a process for their production and their use.
