Abstract (en)  
[origin: EP0783858A1] The support comprises a plastics plate (1) with central hook (2) and a bend line (7) running over the entire width. On one side of the bend line is a stabilising window (4) and on the other side is at least one through opening (5) so that when the plate is bent 180 degs. over the bend line the opening and window align. A holder is provided to hold the support plate in its bent-round position. The plate has an oblong hook-in window (3) for the hanger hooks and this window is curved so that its distance from the stabilising window is smallest in the middle of the plate.
