Abstract (en)
[origin: EP0784013A1] The box comprises a lid (11) which is inserted into a base (10) which has at least two opposite facing walls formed by folded flaps (32,33). The flaps are held in their folded position by the lid. The lid has at least two opposite facing insertion tabs (20,21) which fit into folds in the package side (15,16) or end (17,18) walls and formed by the folding flaps. The folding flaps or folds are fixed solely by the insertion tabs inserted into the flaps or folds. Folded units (30,31) are formed from folded flaps between a preferably closed outer wall or lid flap (24,25) and the contents of the package (13). The insertion tabs fit into a gap (37) between the outer wall or lid flaps and the inner folds or folded units.
