Abstract (en)  
The container consists of a base and a lid which are shaped to leave aeration slits between their adjoining surfaces when fitted together. The corners of the base have recessed elements inside their edges (10), made with channels (11) to receive corner projections on the lid. Each channel (11) has a flat base (13) and vertical sides. An inward projecting lip (12) on the outer vertical side engages with a lid corner projection.
