Abstract (en)
[origin: WO9612632A1] An inline proportioning valve is provided comprising: a housing (22) having first and second ends (24, 26) thereof and having a plurality of cylindrical chambers formed axially therethrough in communication with each other; a subassembly (60) located within the chambers; and wherein the subassembly is staked into position within the chambers by deforming a portion (96) of the first end of the housing sufficiently radially inwardly adjacent the subassembly to hold the subassembly within the housing.
