Abstract (en)
[origin: WO9611146A1] A pack having a body portion (1) defining an article-receiving cavity (12), the body portion having a face (6) in which is defined a dispensing opening (8). A resealable sealing member (9) is secured to the body portion and, in a closing position, covers the opening and is in sealing contact with the body portion around the periphery of the opening. A plurality of sheet-form articles, for example wet wipes, are disposed within the cavity in the form of a flattened roll (13), with one end (14) of the roll being capable of extending through the opening. The body portion is preferably in the general shape of a parallelepiped, and both body portion and sealing member are preferably made of sheet plastics.
