Abstract (en)

[origin: WO9605123A1] A sealed plastics container (1) for holding an alcoholic beverage such as wine; the container comprising: a receptacle (2) for containing the alcoholic beverage therein and which includes a peripheral flange (8) about the mouth of the receptacle, a biocompatible inner surface and a wall having a low gas transmissibility property, a sealing membrane (6) detachably fixed to said flange and including a biocompatible inner surface, a headspace between the alcohol and the biocompatible inner surface of the sealing membrane and containing a biocompatible gas other than oxygen, wherein the membrane seals the alcoholic beverage from contact with air. A support member for releasably supporting a plastics receptacle and a method for packaging an alcoholic beverage in a container are also disclosed.
