Abstract (en)  
The outer shell of the ski boot comprises a foot part (2) and a leg part (3), connected by a joint (4). The leg part can be pivoted from a loose position to a locked skiing position, in which it can be fixed. An actuator (28) is provided for release from the locked position. A first clamp (30) holds the inner shoe (10) in the outer shell and the inner shoe is held against the sole of the outer shell in the skiing position by a second clamp (22). The inner shoe can be inserted into the outer shell through a rear flap (44) arranged pivotably on the foot part. The first clamp is formed by central rotating clamp and the second clamping system presses the first clamp on the instep of the inner shoe.

Abstract (de)  
Schischuh (1) mit einer zweiteiligen Außenschale bestehend aus einem Fußteil (2) und einem Schaffteil (3), wobei der Fußteil (2) mit dem Schaffteil (3) über ein Gelenk (4) verbunden ist, und einem Innenschuh (10), wobei der Schaffteil (3) des Schischuhs (1) schwenkbar ist und zwei Spannsysteme (22, 30) vorgesehen sind. <IMAGE>
