Abstract (en)
The wallet, designed for the delivery of photographic prints and negatives, consists of two compartments, one for the negatives (N) and the other for the prints, each being open along its inner edge and closed along its other three edges. The negative compartment is made with an additional flap, and this has a round tongue (G) cut out of it which is placed over the edge of the negatives once they have been inserted into the compartment so that they cannot drop out accidentally. To remove the negatives the tip of the tongue is pushed away from their edges, and they can then be taken out in the normal way.

Abstract (fr)
