Abstract (en)
[origin: EP0785407A2] A target holder (23) is fixed to an arm (21) or an adaptor (22) which can be attached to a shaft (17). The arm and the adaptor can be applied to the shaft. A housing recess (10) is provided for receiving a control located in a rectangular housing (11) and the first housing (12) receives two drive housings (13) or only one, being formed in a central position. The support frame (1) consists of an all-round tube (2) with at least one cross bracing. The support frame has accommodations (5) for releasable fixture of a roll-over stirrup. The first housing accommodation for the drive housing has at least one strip (14) for hook engagement of a rapid closure (15) on the drive housing.
