Abstract (en)
[origin: EP0785533A2] The whole process is displayed in a flow chart, in this card with the driving entered on a driver's card, starting when the driver inserts his key. Nothing will happen until he then inserts his card and the card checked. Again nothing will happen until the time difference has been checked, ensuring that the driver has had the required length of resting time. If this is so, ignition can occur, while, at the same time, the starting time is recorded on his card. Again, when the time driving exceeds a set maximum value, a warning is given. The driver then has to remove the key and then his card.
