Abstract (en)

[origin: EP0786398A1] The assembly gauge (7) is positioned on a car body frame (3) in an area between at least two neighbouring car body parts (4, 5), and connected to the frame. The gauge has at least one adjusting edge (10) for a neighbouring body part. The gauge has positioning holders, to plug it to corresponding centering elements on frame-fastened hinges of a pivoted body part, and to centre it relative to the hinges. The centering elements consist of projecting pins on the hinges. Each gauge has corresponding open pin holders.
