Abstract (en)
[origin: WO9613602A1] During the commercial production of dextrose from starch, the disaccharide maltulose is produced which cannot be hydrolysed by the enzymes amyloglucosidase, pullulanase or alpha -amylase. The present invention discloses an enzyme preparation for the hydrolysis of maltulose. Enzymatic hydrolysis of maltulose provides a new and additional method for improvement of the monosaccharide levels in the saccharification of starch.
