Abstract (en)
[origin: DE19526086A1] The internal-combustion-engine exhaust-gas system proposed has a manifold (10) with a wall (17) in the surface of which at least one exhaust pipe (8) ends. The wall (17) is made of a flat steel sheet which has been wound round and joined together at a longitudinal seam (20) to form a cylindrical tube. The point or points of entry (21) of the exhaust pipes (8) are at a distance from this longitudinal seam (20).
